

Building a **Stronger** **Credit Union Together**

A message from your **President**

The decision for Evangeline-Central to enter into a merger agreement with Tignish, Malpeque Bay and Provincial is an important one for our credit union. With this new organization, our goal is to strengthen how we fulfill the current and future needs of our collective membership and the commitment we make to our communities.

Why is this merger necessary? The four credit unions share a vision for how we can do more together – identify new opportunities to improve all aspects of our organization, respond to changes in the marketplace and create valued benefits for our members, our employees and our communities.

Our experience with past mergers has demonstrated our success. Since the merger of Evangeline and Central in 2012, we have almost doubled our assets, enhanced products, services, and pricing and created benefits for all.

We recognize any major change creates uncertainty. I can assure you both the Board and Management feel strongly the decision to merge is the right one and it's the right time. We need to drive the organization forward and be proactive in how we approach challenges on the horizon. The combination of knowledge and skills that exist in all four credit unions will certainly position the new organization for future success.

Please join me in supporting this merger proposal. To learn more, I encourage you to visit our website, attend our community meeting, ask questions, and help us build a stronger credit union together.

Imelda Arsenault
President, Board of Directors
