

Building a **Stronger** Credit Union Together

A message from your President

Over the years we have watched our credit union grow exponentially. Now we have the opportunity to strengthen our foundation so we can thrive for years to come. As President of the Board of Directors, I am very excited about the opportunity to merge with three other PEI credit unions.

Extensive research over the last year indicates a merger is the best choice for all – members, employees, and communities.

What does this merger mean for you? As a member you will continue to receive that same level of great service you've come to expect from your credit union. The merger also provides us with the opportunity realize cost savings that can be reinvested in technology and products that provide you with enhanced banking services.

For employees, a larger credit union provides new training and career development opportunities. And all communities served by the new credit union will benefit from an increased capacity for local support.

This is an important decision for all of us. I encourage to get involved, ask questions, and help us build a stronger credit union together. And a reminder to cast your ballot in April. Your vote can shape the future!

Corey Tremere
President, Board of Directors
